# SAFETY DATA SHEET

PureGRAPH™ Graphene Powder

## Section 1. Identification

**Product identifier** : PureGRAPH™ Graphene Powder

Chemical identity : Graphene : 1034343-98-0 **CAS** number Other means of : Not available. identification

**Product use** : This substance is used in the following products: adhesives and sealants, coating

> products, fillers, putties, plasters, metal surface treatment products, non-metalsurface treatment products, inks and toners, laboratory chemicals, lubricants and greases, metal working fluids, and polymers including composites, plastics and

rubbers.

This substance is used in the following areas: printing and recorded media reproduction. This substance is used for the manufacture of: plastic, rubber and composite products. The substance is used in mining services, leisure equipment,

construction and energy storage devices.

Supplier's details : First Graphene Ltd

1 Sepia Close, Henderson, WA 6166, Australia

Tel.: +61 1300 660448 (Office hours WA 0800 to 1700)

e-mail address of person responsible for this SDS

: info@firstgraphene.net

**Emergency telephone** number of the company : +61 1300 660448 (Office hours WA 0800 to 1700)

# Section 2. Hazard(s) identification

Classification of the substance or mixture Not classified

**GHS** label elements

Signal word : No signal word.

**Hazard statements** : No known significant effects or critical hazards.

**Precautionary statements** 

**Prevention** : Not applicable. Response : Not applicable. **Storage** : Not applicable. **Disposal** : Not applicable. : Not applicable. Supplemental label

result in classification

Other hazards which do not : Fine dust clouds may form explosive mixtures with air.

Date of issue/Date of revision : 08/03/2022 Date of previous issue :04/02/2019 Version :1.1 1/10

elements

# Section 3. Composition and ingredient information

Substance/mixture : Substance
Chemical identity : Graphene
Other means of : Not available.
identification

## **CAS** number/other identifiers

CAS number : 1034343-98-0 EC number : Not available.

Ingredient name	% (w/w)	CAS number
Graphene	100	1034343-98-0

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

## Section 4. First aid measures

## **Description of necessary first aid measures**

**Eye contact**: Immediately flush eyes with plenty of water, occasionally lifting the upper and lower

eyelids. Check for and remove any contact lenses. Get medical attention if irritation

occurs.

**Inhalation** : Remove victim to fresh air and keep at rest in a position comfortable for breathing.

Get medical attention if symptoms occur.

Skin contact : Flush contaminated skin with plenty of water. Remove contaminated clothing and

shoes. Get medical attention if symptoms occur.

Ingestion : Wash out mouth with water. If material has been swallowed and the exposed

person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms

occur.

## Most important symptoms/effects, acute and delayed

## Potential acute health effects

**Eye contact** : Exposure to airborne concentrations above statutory or recommended exposure

limits may cause irritation of the eyes.

**Inhalation** : Exposure to airborne concentrations above statutory or recommended exposure

limits may cause irritation of the nose, throat and lungs.

**Skin contact**: No known significant effects or critical hazards.

**Ingestion** : No known significant effects or critical hazards.

## Over-exposure signs/symptoms

**Eye contact**: Adverse symptoms may include the following:

irritation redness

**Inhalation** : Adverse symptoms may include the following:

respiratory tract irritation

coughing

Skin contact : No specific data.

Ingestion : No specific data.

#### Indication of immediate medical attention and special treatment needed, if necessary

Notes to physician : Treat symptomatically. Contact poison treatment specialist immediately if large

quantities have been ingested or inhaled.

**Specific treatments**: No specific treatment.

**Protection of first-aiders** : No action shall be taken involving any personal risk or without suitable training.

Date of issue/Date of revision : 08/03/2022 Date of previous issue : 04/02/2019 Version : 1.1 2/10

## Section 4. First aid measures

See toxicological information (Section 11)

## Section 5. Firefighting measures

## **Extinguishing media**

Suitable extinguishing media

: Use dry chemical, CO<sub>2</sub>, water spray (fog) or foam. Use an extinguishing agent suitable for the surrounding fire.

Unsuitable extinguishing

: Do not use water jet.

# Specific hazards arising from the chemical

Hazardous thermal decomposition products

: No specific fire or explosion hazard.

: Decomposition products may include the following materials: carbon monoxide carbon dioxide

# Special protective actions for fire-fighters

: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.

# Special protective equipment for fire-fighters

: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

## Hazchem code

: Not available.

Remark (Explosibility)

: May form explosible dust-air mixture if dispersed.

## Section 6. Accidental release measures

#### Personal precautions, protective equipment and emergency procedures

For non-emergency personnel

: No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Avoid breathing dust. Put on appropriate personal protective equipment.

For emergency responders:

Fspecialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

#### **Environmental precautions**

: Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

## Methods and material for containment and cleaning up

Small spill

: Move containers from spill area. Vacuum or sweep up material and place in a designated, labelled waste container. Dispose of via a licensed waste disposal contractor.

## Large spill

: Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Vacuum or sweep up material and place in a designated, labelled waste container. Avoid creating dusty conditions and prevent wind dispersal. Dispose of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Date of issue/Date of revision : 08/03/2022 Date of previous issue : 04/02/2019 Version : 1.1 3/10

## Section 7. Handling and storage

## Precautions for safe handling

#### **Protective measures**

: Put on appropriate personal protective equipment (see Section 8). Avoid breathing

# Advice on general occupational hygiene

: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

# Conditions for safe storage, including any incompatibilities

: Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

# Section 8. Exposure controls and personal protection

#### **Control parameters**

Occupational exposure limits

None.

# Appropriate engineering controls

: Use only with adequate ventilation. If user operations generate dust, fumes, gas, vapour or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

# **Environmental exposure** controls

: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

#### **Individual protection measures**

### **Hygiene measures**

: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period.

Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

## **Eye/face protection**

: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields. If operating conditions cause high dust concentrations to be produced, use dust goggles.

# Skin protection Hand protection

: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.

## **Body protection**

: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Date of issue/Date of revision : 08/03/2022 Date of previous issue : 04/02/2019 Version : 1.1 4/10

## Section 8. Exposure controls and personal protection

Other skin protection

Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Respiratory protection

: Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

# Section 9. Physical and chemical properties

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

**Appearance** 

**Physical state** : Solid. [Powder.]

Colour : Black.

Odour Not available. : Not available. **Odour threshold** pН : Not available. **Melting point/freezing point** : 4500°C (8132°F) Boiling point, initial boiling : Not available.

point, and boiling range

Flash point : Not applicable. **Evaporation rate** : Not available. Not available. **Flammability** : Not applicable. Lower and upper explosion

limit/flammability limit : Not available. Vapour pressure Relative vapour density Not applicable. : Not available. **Relative density** Solubility : Not available. Solubility in water Insoluble.

Partition coefficient: noctanol/water

: Not available.

**Auto-ignition temperature** : Not applicable. : Not available. **Decomposition temperature** : Not applicable. **Viscosity** Flow time (ISO 2431) : Not available.

: May form explosible dust-air mixture if dispersed. **Explosive properties** 

**Oxidising properties** : Not expected based on structure.

**Particle characteristics** 

: 20 µm [laser diffraction] Median particle size

# Section 10. Stability and reactivity

: No specific test data related to reactivity available for this product or its ingredients. Reactivity

Chemical stability : The product is stable.

Possibility of hazardous reactions

: Under normal conditions of storage and use, hazardous reactions will not occur.

**Conditions to avoid** : Keep away from heat, sparks and flame. Avoid dust generation.

Date of issue/Date of revision : 08/03/2022 Date of previous issue :04/02/2019 Version :1.1 5/10

# Section 10. Stability and reactivity

Incompatible materials

: Reactive or incompatible with the following materials: oxidising agents, reducing agents.

Hazardous decomposition products

: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

## **Section 11. Toxicological information**

## Information on toxicological effects

## **Acute toxicity**

Product/ingredient name	Result	Species	Dose	Exposure
Graphene	LD50 Oral	Mouse - Male, Female	>5000 mg/kg	-

## Conclusion/Summary

: Based on available data, the classification criteria are not met.

## **Irritation/Corrosion**

Product/ingredient name	Result	Species	Score	Exposure	Observation
Graphene	Skin - Non-irritating to the skin.	Rabbit	-	-	72 hours
	Eyes - Non-irritating to the eyes.	Rabbit	-	-	72 hours

## **Conclusion/Summary**

SkinBased on available data, the classification criteria are not met.EyesBased on available data, the classification criteria are not met.

## **Sensitisation**

Pro		Route of exposure	Species	Result
Gra	aphene	skin	Guinea pig	Not sensitizing

## **Conclusion/Summary**

Skin : Based on available data, the classification criteria are not met.

## **Mutagenicity**

Product/ingredient name	Test	Experiment	Result
Graphene	OECD 476	Experiment: In vitro Subject: Mammalian-Animal	Negative

**Conclusion/Summary** 

: Based on available data, the classification criteria are not met.

**Carcinogenicity** 

Conclusion/Summary : Not available.

**Reproductive toxicity** 

**Conclusion/Summary**: Not available.

**Teratogenicity** 

Conclusion/Summary: Not available.

Specific target organ toxicity (single exposure)

Not available.

Specific target organ toxicity (repeated exposure)

Not available.

#### **Aspiration hazard**

Not available.

Date of issue/Date of revision : 08/03/2022 Date of previous issue : 04/02/2019 Version : 1.1 6/10

# Section 11. Toxicological information

Information on likely routes : Not available.

of exposure

### Potential acute health effects

**Eye contact** 

: Exposure to airborne concentrations above statutory or recommended exposure

limits may cause irritation of the eyes.

Inhalation

: Exposure to airborne concentrations above statutory or recommended exposure

limits may cause irritation of the nose, throat and lungs.

Skin contact : No known significant effects or critical hazards. : No known significant effects or critical hazards. Ingestion

## Symptoms related to the physical, chemical and toxicological characteristics

**Eye contact** 

: Adverse symptoms may include the following:

irritation redness

Inhalation

: Adverse symptoms may include the following:

respiratory tract irritation

coughing

Skin contact : No specific data. No specific data. Ingestion

## Delayed and immediate effects as well as chronic effects from short and long-term exposure

### **Short term exposure**

**Potential immediate** 

: Not available.

effects

Potential delayed effects : Not available.

Long term exposure

Potential immediate

effects

: Not available.

Potential delayed effects

: Not available.

## Potential chronic health effects

Product/ingredient name	Result	Species	Dose	Exposure
Graphene	Sub-acute NOAEL Inhalation	Rat - Male	≥1.88 mg/m³	28 days; 5 days
	Dusts and mists			per week

**Conclusion/Summary** 

: Based on available data, the classification criteria are not met.

**General** 

Repeated or prolonged inhalation of dust may lead to chronic respiratory irritation.

Carcinogenicity Mutagenicity

: No known significant effects or critical hazards. : No known significant effects or critical hazards.

Reproductive toxicity

: No known significant effects or critical hazards.

#### **Numerical measures of toxicity**

## **Acute toxicity estimates**

Not available.

Date of issue/Date of revision : 08/03/2022 Date of previous issue :04/02/2019 Version :1.1 7/10

## **Section 12. Ecological information**

## **Toxicity**

Product/ingredient name	Result	Species	Exposure
Graphene	Acute EC50 62.2 mg/l	Algae - Chlorella pyrenoidosa	96 hours
	Acute EC50 16 mg/l	Daphnia - Daphnia magna	48 hours

**Conclusion/Summary** 

: Harmful to aquatic life with long lasting effects.

#### Persistence and degradability

Product/ingredient name	Test	Result	Dose	Inoculum
<b>©</b> raphene	OECD 301	0 % - Not readily - 28 days	-	-

**Conclusion/Summary**: Not readily biodegradable.

Product/ingredient name	Aquatic half-life	Photolysis	Biodegradability
<b>©</b> raphene	-	-	Not readily

## **Bioaccumulative potential**

Not available.

### **Mobility in soil**

Soil/water partition coefficient (Koc)

: Not available.

Mobility : Not available.

Other adverse effects : No known significant effects or critical hazards.

# Section 13. Disposal considerations

### **Disposal methods**

The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.
